As part of our integration with Banner, we have created a “Faculty Advisor” course for all faculty members listed in Banner, and we have added all current advisees to those courses. You can use the Quickmail block in that Faculty Advisor course to send an email message to all your advisees, and you can use the Scheduler to allow your advisees to schedule an appointment with you. In this “Quick Start Guide,” we will focus on how to set up those appointment slots for students to use in order to sign up for advising appointments.

1. Go to our Moodle server at http://moodle.bucknell.edu, or use the Moodle link on the internal Bucknell home page at http://www.bucknell.edu/x19222.xml.
2. Look for your “Faculty Advisor: : YourLastName, YourFirstName” course under “Advising” in the Current Course List module on the right-hand side of the screen, and click on the link for that course.
3. If the Edit Mode is “off,” click on the “Turn editing on” button at the top-right of the screen:

4. Move your mouse to the bottom-right corner of the topic area where you want to add the appointment scheduler, and click on the link for “Add an activity or resource”:

5. The Scheduler is one of the Activities you can add to a course. Scroll down in the list of activities (ordered alphabetically) until you find “Scheduler,” and double-click on the link (or click on the radio button to the left of Scheduler, and click on the Add button):
6. Add a name for the Scheduler, such as “Advisee Appointments.” Among the Scheduler options, you’ll want to check (and modify, if needed) the “Default slot duration” - in other words, the default length of an individual student conference – which is initially set to 15 minutes:
7. You (and your students) may also want to receive an email message when they apply for an appointment slot, so you may want to scroll down to find the “Notifications” option, and change “No” to “Yes”:

![Image of Notifications dropdown](image)

1. Click to drop down options
2. Click on “Yes”

8. Once you are done modifying the settings for the Scheduler, scroll down to the bottom of the page, and click on the button.

9. If you accidentally clicked on the “Save and Return to Course” button, Moodle will return you to the main page for your course. Click on the link for the scheduler that you just created. If you clicked on “Save and display,” you’ll be at a page that will allow you to add particular time slots to the Scheduler. To add multiple time slots all at once, click on “Add slots” and then “Add repeated slots”:

![Image of Add slots dropdown](image)

1. Click to drop down choices
2. Click “Add repeated slots”
10. On the Add slots page, you will need to set up the available appointment times. You may want to change the following settings on that page:

- **Date**: This is the starting date for the appointments. In the image below, we are assuming that the appointments will begin on Monday, October 26.

- **Repeat Time Slot Until**: This is the end date for those appointments. We are assuming (for this example) that appointments will end on Friday, October 30.

- **Add appointments on**: Choose the days of the week when you want appointments. By default, all weekdays are selected, so you’ll need to de-select the days that you don’t want.

- **Start time** and **End Time**: As their names suggest, the start time is the time when you want the initial appointment to begin, and the end time is when you want the final appointment to end. Moodle uses “military time,” so in our example below, we are assuming that appointments will begin at 1 PM (choosing 13:00 as the Start time) and will end at 4:00 PM (choosing 16:00 as the End time).

- **Duration**: This gives you another opportunity to specify how long each appointment should last.

- **Location**: If you specify your office location, it will appear on the Scheduler when students sign up for slots.

- **Email a reminder**: If you’d like, you can set a date when students will be reminded of their appointment. In the image below, we asked Moodle to send a reminder to the student one day before the actual appointment.

11. We will follow with screen captures of the settings you may want to change:

   a. Add beginning and ending dates for the appointments:
b. Deselect the weekdays when you do **not** want appointments:

![Scheduler Diagram]

1. Click to deselect days you don’t want

---

c. Choose the start and end times for those appointments:

![Scheduler Diagram]

**Choose Start/End Times (24-hour clock)**

---

d. Make sure that the duration of each appointment is what you want. By default, the duration is 15 minutes per appointment:

![Scheduler Diagram]

**Enter the desired duration for each appointment**
e. Enter your office location (if desired):

[Image: Location input field with BERT316 entered]

Enter office location (if desired)

f. You can choose to have Moodle send email to your advisees to remind them of the appointment slot that they chose:

[Image: Email reminder settings]

1. Click to drop down choices
2. Choose reminder time

12. After you have made all of the settings changes that you need, scroll down to the bottom of the page, and click on the **Save changes** button. Moodle will then display a list of the available appointments. Your students will be able to click in a radio button to select a particular appointment, and when you click on the link to return to the Scheduler you created, you’ll be able to see which slots students have selected.
